

GUTS

10 marks

This is an introduction to the serious business of digestion. What you have to do is:

- * cut out the chubby little fellow and put his guts inside him
- * cut out the names and what they do
- * neatly label each part and alongside put what it does
- * colour code the part, name, and what it does.
- * marks are for accuracy and presentation

THE BODY	THE GUT PARTS	WHAT THEY DO
		<p>This is like a bag. Here ACID and JUICES are mixed with the food to DIGEST it.</p>
		<p>'Food' that cannot be digested comes out here.</p>
		<p>This is a long, narrow, bent-up tube. Most of the food is DIGESTED in here. The 'goodness' from the food is then taken by the BLOOD to all parts of the body.</p>
		<p>WATER is taken out of the food as it passes through this wide tube.</p>
		<p>MUSCLES in the wall of this tube push the food along after it has been SWALLOWED.</p>
<th data-bbox="683 1715 927 1778">THE NAMES</th>	THE NAMES	<p>Here the food is CHEWED and mixed with SALIVA. This saliva starts to DIGEST the food.</p>
	<p>This is a tiny pouch that goes nowhere. It is of no use to humans.</p>	
	<div>MOUTH</div> <div>STOMACH</div> <div>ANUS</div>	
	<div>SMALL INTESTINE</div> <div>LARGE INTESTINE</div>	
	<div>OESOPHAGUS</div> <div>APPENDIX</div>
