GEORGINA TUARI STEWART

Georgina (nō Ngāpuhi-nui-tonu, nō Pare Hauraki) is an Associate Professor in Te Ara Poutama at AUT in Auckland. She was formerly a teacher of science, mathematics and te reo Māori in both English-medium and Māori-medium intermediate and secondary schools in Auckland and Whangarei. She completed doctoral studies on the Māori science curriculum in 2007, and has been researching the relationship between science and Māori knowledge for over 20 years.

ANGELO TEDOLDI

Angelo is a student science teacher with Ako Mātātupu – Teach First NZ, in the second year of the Post Graduate Teaching Diploma course for secondary education. He is passionate in understanding and supporting others in adding mātauranga Māori in the science curriculum.

BRIAN TWEED

Brian is a Senior Lecturer at Te Kura o te Mātauranga, The Institute of Education, Massey University. He has been involved with Māori-medium mathematics and science education as a teacher, advisor and researcher for the last 20 years.

10 NOVEMBER 2022

3:30-4.30 PM VIA ZOOM

This **free, online** workshop is aimed at secondary science teachers who are facing for the first time being obliged to consider the inclusion of Māori words and concepts in the NCEA achievement standards they use to assess their students. The aim of the workshop is to unpack the issue of incorporating Māori knowledge into the science curriculum, and help science teachers see the new proposals in a more balanced and optimistic way. We look forward to hearing from the teachers who attend, and plan to allow plenty of time for questions and discussion.
