

Dear Chemistry Educators,

We are excited to invite you to learn more about the Alchemists Memory Set (AMS), an engaging and innovative tool designed to bring Organic Chemistry to life for students.

The AMS introduces fundamental Chemistry concepts through interactive, game-based learning that enhances retention and fosters a deep understanding of the subject.

Join us for an introductory session where you will:

- Explore the structure and design of the AMS and its application in the classroom.
- Discover how AMS can serve as a powerful tool to motivate and engage students of all levels.
- Learn about the upcoming 2025 Alchemists Competition, an event where students can showcase their knowledge, critical thinking, and creativity in Chemistry.

This session is open to all Chemistry teachers who are curious to learn more and interested in integrating Alchemists (AMS) into their curriculum. Whether you are new to Alchemists (AMS) or considering participation in the Alchemists Competition, this event will provide valuable insights and resources to bring AMS to your students.

Event Details:

- **Date:** 29 Nov 2024
- **Day:** Friday
- **Time:** 11.30 am – 12.20 pm
- **Location:** Online
