

## 36th annual Rotary National Science & Technology Forum

Applications are now being accepted for the 168 places available at the Jan. 2026 Science Forum.

This is a live-in event in Auckland (10-24 Jan. 2026), bringing 168 Yr 13 science students together from throughout Aotearoa NZ. For 14 days like-minded students will explore tertiary-level science, mathematics and technology. They will participate in lectures, laboratories and field stations, meeting industry leaders and visiting organisations across a range of sectors.

For all details, please see: <https://rotaryscienceforum.nz/> Local Rotary Clubs offer to sponsor students, often providing 50% of the student's fees. Applications are online, and must be submitted by 29 August at latest.

See the website, where there are special sections for Students and for Schools. All secondary schools should be aware of this opportunity, and already working with their local Rotary club to engage with students. After submission of application forms, students are interviewed and, if accepted, offered sponsorship.
